EPICUR Hubs Pilot 2025-2026

Call for Hubs course proposals for Autumn/Winter 2025/26

Kirsten Rosa (EPICUR Research-Oriented Teaching Officer, KIT)

Hubs pilot phase (April 2025 - March 2026)

Objective of the EPICUR Hubs:

- To foster transnational academic and research collaboration, equipping master's students and early career researchers with interdisciplinary skills and networks for success within and beyond academia through diverse, flexible learning and engagement opportunities.

Pilot topics:

- **Sustainable Transformation**
- **Transversal & research skills**

Target groups:

- **Master's students** considering a career in research
- **Early career researchers (ECRs):** PhDs, postdocs, junior professors

Co-leading universities:

- Karlsruhe Institute of Technology (KIT)
- Aristotle University of Thessaloniki, Greece (AUTH)

Call for Hubs courses and training offerings

- **Call for opening existing courses** in the following areas to participants from the other EPICUR universities:
 - **Sustainable Transformation**
 - **Transversal courses and workshops:** e.g. Citizen Science, innovation, scientific publishing, writing grant applications, etc.
- **Call for interest in developing joint courses** in the above areas – we can put you in touch with teaching staff and researchers from the other universities!

Why contribute?

- Benefits of being involved in the EPICUR Hubs:
 - Connect with other professors, researchers and staff at the other EPICUR universities to offer joint courses, events and programmes
 - Tap into EPICUR's network of 9 universities to explore possibilities for new research and teaching cooperation
 - Advertise research stay opportunities to attract junior research talent from other EPICUR universities
- Contact Kirsten Rosa (kirsten.rosa@kit.edu) to find out more about the Hubs and how to get involved!
